

UNDERSTANDING THE NEED FOR NAVIGATION

It doesn't have to cost more to be a company that cares more

Healthcare navigation is one of the fastest-growing industries in the country, with 74% of large employers* currently using or planning to implement a navigation solution in the next year.

To meet the increased demand, the number of navigation providers is also growing rapidly. Before choosing which partner is right for your company, it's important to understand what you're getting.

As the creator of the navigation industry, Quantum Health is uniquely positioned to understand what it takes to be a successful partner. We offer the most **comprehensive**, **effective** solutions available, delivering **proven results** for more than two decades.

- Only responds when a member initiates contact
- Processes claims **without advocating for members** to ensure they are receiving cost-effective care
- Fails to provide a single source of contact
- Covers claims costs or provides insurance coverage
