

The One Place for Health and Care is Here

When your people need care, the first step is knowing where to start. The second is feeling assured and confident in the care they'll receive.

Transcarent eliminates the guesswork from the health and care experience, guiding Members to the right level of care through:

- ✓ Personalized app experience
- ✓ On-demand care team available 24/7
- ✓ Connected ecosystem of high-quality providers, virtually or in-person

Better care experiences, less complexities

From virtual, in-person or at-home, Members can connect to the care they need - from primary to specialty care and pharmacy - virtually or in-person.

Rigorous quality scoring powered by 10B claims

Our data-driven quality scoring algorithm includes physician specialty and episodic level evaluation vs. the standard practice which only compares facilities to one another, often for different clinical outcomes.

Improved outcomes through personalized engagement

Predictive analytics and clinical expertise drives early intervention, reducing inappropriate care.

How We're Different

Care in 60 Seconds

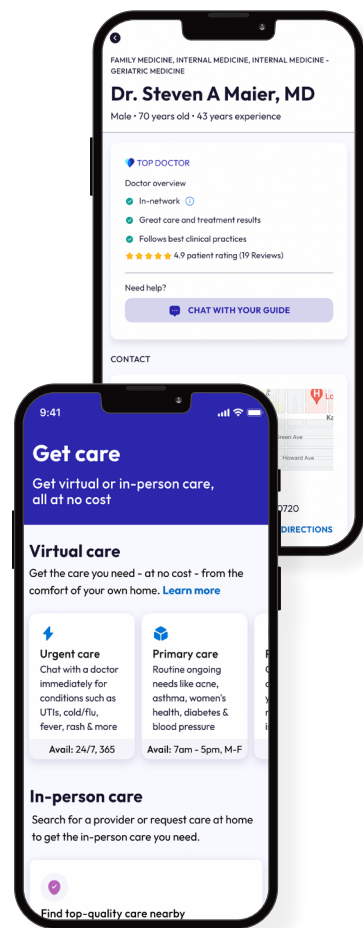

The Transcarent Clinic is the only experience that provides instant chat with a doctor. Clinicians are empowered by AI and technology, to reduce patient wait times, and deliver better care at lower costs.

Preferred Access to Top Doctors from High-Quality Health Systems

The only National Independent Provider Ecosystem in market – consisting of 10 (and growing) of the highest-quality, largest, and most prestigious health systems that provide preferred concierge access at guaranteed discounted rates.

Configurable Platform and Sophisticated Integration Capabilities

We will integrate with everything you already have, as much as you need, or as light as you want. We make your benefits available to your employees in one easy-to-use mobile application.

EVERYDAY CARE

Chat with a doctor for routine physical and behavioral health care

PHARMACY CARE

Transparent prescription pricing, with low-cost options and savings alerts

MSK & SURGERY CARE

End-to-end treatment support, from expert medical opinions to recovery

ONCOLOGY CARE

Concierge cancer care from early detection to recovery and return to work

WEIGHT HEALTH

Comprehensive approach to lifestyle support, bariatric surgery, and prescription management

Get More and Spend Less

- One place to access your full suite of benefits and networks
- One contract, implementation, ROI and report
- Plus, at-risk pricing with measurable experience, health, and savings results

1 low, at-risk PEPM or shared savings model

1 implementation

1 contract

1 integrated report
