

# About Crossover Health

Crossover is a leader in delivering value-based hybrid care with a focus on wellbeing and prevention. We build trusted relationships with our members and offer care in person, online, and anytime using data analytics and social determinants of health to deliver concrete results. **Together we're building health as it should be.**

## Proven outcomes

Crossover's Primary Health model is designed to drive engagement where it matters most—with the member. Here are some of the ways we've shifted the cost equation and changed the way employees of the world's most influential companies use healthcare.

### SATISFACTION

93% of Crossover members "love" their healthcare here and 81% make us their "medical home"

### MENTAL HEALTH

Crossover members get mental health appointments in an average of 6 days, 42 days faster than in the community

### SAVINGS

Crossover's care model can deliver a 15% reduction in total healthcare costs

### AVAILABILITY

Crossover has care teams licensed in all 50 states to provide online care for members

# Comprehensive, Integrated, and Accountable: Occupational Medicine That Fits Your Needs

No matter your industry or the distribution of your workforce, Crossover Health can partner with you to build an Occupational Medicine solution that works for your employees. We work with you to design a care model that is integrated with the rest of your employees' care, is aligned with your goals, and is backed by evidence-based outcomes and results.

## Comprehensive Care

Fully connected with Crossover primary care, physical medicine, mental health, and health coaching

High-touch navigation to high-value specialists when needed

## Integrated Design

Coordinate with employers to customize services and delivery

Payment for value, not visits

Flexible implementations to meet your needs

## Measurement-Based Care

Early intervention driven by data insights

Increased access and reduced barriers to care

Evidence-based approach to recovery and return-to-work

### Health Screenings and Surveillance

Promote worker health and ensure compliance with job requirements

Post-offer physicals, Fit-for-Duty tests, drug and alcohol tests, DOT physicals, COVID-19 tests, OSHA required surveillance (audiogram, respirator)

### Initial Injury and Illness Management

Triage and first aid for workplace injury and illness

Incident response and triage, referrals to higher level care when required

### Occupational Physical Medicine

Assistance returning to health and work

Therapeutic exercise, recovery and rehabilitation, strength and functional improvement, pain management for work-related injuries

### Injury and Illness Prevention

Providing assessments, care, and education to avoid injury and illness

Ergonomics, injury prevention training, industrial athlete programs (early intervention), vaccines, travel medicine, preventative health assessments

### Organizational Health Consultation

Optimize Health for your entire organization

OH program advisory, organizational health assessments, worksite walkthroughs

### Workers' Comp Management

Manage cases from diagnosis through treatment and return-to-work

Diagnosis and first report of injury, coordination with care team, referral management, return-to-work management

## Benefits for your Employees and your Bottom Line

- ✓ Enhanced outcomes from truly integrated, evidence-based care
- ✓ Higher employee productivity, satisfaction, and retention
- ✓ Lower costs associated with injury and disability
- ✓ Administrative simplicity through single vendor
- ✓ Improved employee care experience and access to Primary Care
- ✓ Value-based, not volume-based, pricing
