

IMMUNIZE powered by Moderna

Moderna is engaging with leaders in the market to develop a program that focuses on partnering with employers to drive employee engagement and adoption of COVID-19 vaccines.

Immunize is a digital-first COVID-19 experience designed to connect employees with educational materials and access to care via well-established vaccination providers.

It's intended to be:
comprehensive • convenient • available nationwide
tailored to help you meet your company goals and needs

Partnering with Moderna could mean:
access to preferred pricing • engagement with high-quality vaccine providers

About Moderna

In over 10 years since its inception, Moderna has transformed from a research-stage company advancing programs in the field of messenger RNA (mRNA), to an enterprise with a diverse clinical portfolio of vaccines and therapeutics across seven modalities, a broad intellectual property portfolio and integrated manufacturing facilities that allow for rapid clinical and commercial production at scale. Moderna maintains alliances with a broad range of domestic and overseas government and commercial collaborators, which has allowed for the pursuit of both groundbreaking science and rapid scaling of manufacturing. Most recently, Moderna's capabilities have come together to allow the authorized use and approval of one of the earliest and most effective vaccines against the COVID-19 pandemic.

Moderna's mRNA platform builds on continuous advances in basic and applied mRNA science, delivery technology and manufacturing, and has allowed the development of therapeutics and vaccines for infectious diseases, immuno-oncology, rare diseases, cardiovascular diseases, and auto-immune diseases.
